

How to add and the cvBlobslib library in your VS2008 project

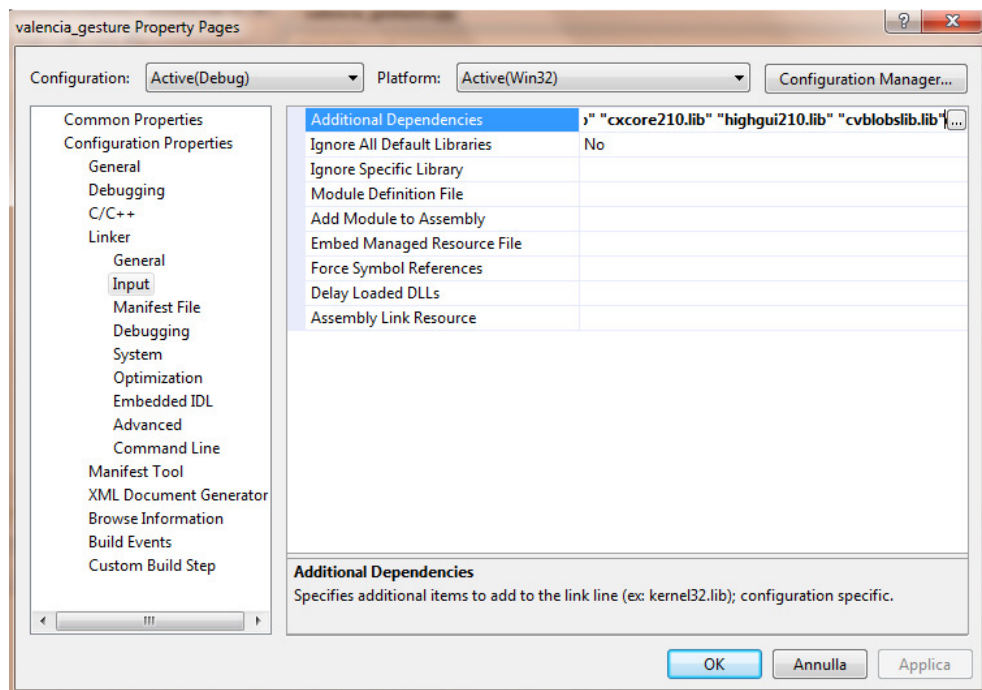

1. In Tools/Options /Projects and Solutions/VC++ Directories

add the directory where the blob library is stored, in the Include files list. And add the Debug directory where the blob library is stored, in the Library files list.

2. In Project/Properties/Configuration Properties/Linker/Input/Additional Dependencies

add the cvblobslib.lib file

3. Include the file "BlobResult.h" in the Headers files of your Project
